

Jiaxun JIANG

RESEARCH INTERESTS

- AI for Social Systems** - Data-driven modeling and learning for complex social systems
- Computational Social Science** - Using large-scale data to analyze social dynamics and collective human behavior
- Human Behavior Modeling from Data** - Spatiotemporal modeling of human activity using statistical and ML methods

EDUCATION

Politecnico di Milano

Milan, Italy

Master of Science in Geoinformatics Engineering (CS Track)

09.2024 - Present

- Coursework** | Geospatial Data Analysis, Positioning and Location-Based Services, Earth Observation, Foundations of Operations Research(27), Artificial Neural Networks and Deep Learning(28), Computing Infrastructure(30L)

Nanning Normal University

Guangxi, China

Bachelor of Engineering in Computer science and technology

09.2020 - 06.2024

- Coursework** | Big Data Application Development with Python (95), Hands-on Complex Data Preprocessing (90), Database Principles and Applications (88), Business Intelligence(86)

RESEARCH EXPERIENCE

Spatiotemporal Analysis of Nighttime Light Dynamics in Hubei Province

Milan, Italy

Research Assistant

03.2025 - 06.2025

- Conducted data-driven analysis of human activity dynamics using large-scale nighttime light datasets (2019–2023)
- Designed spatiotemporal analysis pipeline for extracting regional patterns and temporal evolution trends
- Quantified urban development and socio-economic activity through statistical indicators and spatial comparison
- Identified heterogeneous growth patterns across regions, supporting interpretation of collective human behavior

Intelligent Crop Growth Prediction System (Spatial AI Application)

Milan, Italy

Research Assistant (3i Computing lab, Nanning Normal University)

01.2022 - 06.2023

- Developed a data-driven prediction system integrating remote sensing, GPS data, and deep learning models
- Performed spatial data fusion and feature extraction from multi-source geospatial data
- Applied machine learning techniques to model crop growth patterns and environmental influence factors
- Gained experience in real-world deployment of AI models on spatial and environmental data

Predictive Modeling for Structured Socio-economic Data (IPO Forecasting)

Guangxi, China

Undergraduate Thesis (Nanning Normal University)

10.2023 - 05.2024

- Built predictive models on structured enterprise datasets to estimate IPO likelihood
- Performed feature engineering and statistical analysis to identify key influencing factors
- Evaluated model performance using quantitative metrics and comparative approaches
- Developed understanding of applying data-driven methods to socio-economic systems

ADDITIONAL EXPERIENCE

Bank of Changsha

Hunan, China

Internship (Data Analytics Division, FinTech Center)

08.2023 - 01.2024

- Conducted data analysis on financial datasets to support business decision-making
- Developed analytical reports based on empirical data modeling and trend analysis
- Improved understanding of real-world data pipelines and applied analytics

VOLUNTEER & COMMUNITY ENGAGEMENT

Milan Cortina 2026 Winter Olympic Games

Milan, Italy

Athlete Services Volunteer

02.2026

- Managed access control for competition and training areas and coordinated athlete schedules, notifications, and on-site guidance.

China-ASEAN Youth Development Forum

Guangxi, China

Team Leader

08.2022

- Facilitated discussions on sustainable urban development and youth social innovation.

Student Union of Nanning Normal University

Guangxi, China

Presidium Member

09.2020 - 06.2023

- Coordinated over 40 university-level events involving 25,000+ participants, enhancing community interaction.

AWARDS & HONORS

- Excellent Graduate Award**, Nanning Normal University (2024)
- First Prize**, 8th China International "Internet+" Innovation & Entrepreneurship Competition (2022)
- First Prize**, Teacher Ethics Speech Contest, Guangxi Autonomous Region (2021)
- Excellent Student Cadre Award**, Nanning Normal University (2021-2023)
- Best Volunteer Award**, Nanning Normal University (2021)
- Innovation & Entrepreneurship Project**, Provincial Level (2021-2023)

SKILLS

Technical Skills | Python, Java, SQL, MATLAB, LaTeX.

Research Skills | Proficient in ArcGIS Pro, Google Earth Engine, QGIS, PostgreSQL, VS Code, Anaconda.

Languages | Native Mandarin speaker. Research proficiency in English. Basic Italian.

Activities and Hobbies | Host, Speech, Dance, Tennis.
