Jiaxun JIANG

RESEARCH INTERESTS

- **Social sensing and computational social science** - Platform-expressed concerns and urban service requests
- **Explainable spatial analytics and GeoAI** - Geographic heterogeneity, spatial validation, and interpretable models
- **Urban governance and disaster resilience** - Environmental policy, residential damage, and early administrative rebuilding activity

EDUCATION

Politecnico di Milano — **Milan, Italy**
Master of Science in Geoinformatics Engineering (CS Track) — *09.2024 - Present*

- **Coursework** | *Geospatial Data Analysis, Positioning and Location-Based Services, Earth Observation, Artificial Neural Networks and Deep Learning, Foundations of Operations Research(27), Databases(29), Computing Infrastructure(30L)*

Nanning Normal University — **Guangxi, China**
Bachelor of Engineering in Computer science and technology — *09.2020 - 06.2024*

- **Coursework** | *Big Data Application Development with Python (95), Hands-on Complex Data Preprocessing (90)*

PUBLICATIONS

Pu Zhang, **Jiaxun Jiang**, Yiliang Li, Na Jiang, and Pan Hui. Spatial Heterogeneity of Platform-Expressed Concerns about Environmental Policy Implementation: Evidence from China's Crop-Residue Burning Restrictions. *Environmental Impact Assessment Review*, Accepted, 2026.

Pu Zhang, **Jiaxun Jiang**, and Pan Hui. Predictive stability but explanatory sensitivity across urban grid resolutions: Evidence from NYC 311 service requests. *Applied Geography*, Under review.

RESEARCH EXPERIENCE

From Structure Loss to Early Rebuilding: Spatial Damage Disparities in the 2025 Los Angeles Fires and Permit Entry after the Eaton Fire — **Politecnico di Milano**
MSc Thesis | Advisor: Daniele Oxoli · Co-advisor: Pan Hui — *06.2026 - 11.2026*

- *Integrated inspections, satellite observations, property attributes, and permit records. Analyzed 276 grid–fire observations covering 21,517 inspected residences in the Eaton and Palisades fires.*
- *Analyzed time to first recorded permit application for 5,804 severely damaged residential parcels in the Eaton county reporting area. Identified 14 of 56 eligible 500 m cells with relatively high damage and low observed permit entry.*

MC² Lab — **HKUST (Guangzhou)**
Visiting Student — *04.2026 - 12.2026*

- ***Crop-residue burning restrictions** · Collected, cleaned, and organized data on policy concerns expressed online, supported the research across the pipeline, and wrote the initial manuscript draft.*
- ***NYC 311 service requests** · Prepared 2018 service request data and urban predictors at 300 m and 1,000 m. Contributed to writing a study using spatial validation, SHAP interpretation, and spatial diagnostics.*

SELECTED PROJECTS

Python Toolbox for Land-Cover Fractions and Forest Dynamics — **Milan, Italy**
Co-developed with Xinchen Yu under Daniele Oxoli — *03.2026 - 04.2026*

- *Built reusable CCI and GLC workflows for quality checks, forest cover comparisons, and regional summaries.*
- *Produced notebooks, synthetic xarray tests, and reproducible figures.*

Spatiotemporal Analysis of Nighttime Light Dynamics in Hubei Province — **Milan, Italy**
Research Assistant — *03.2025 - 06.2025*

- *Conducted data-driven analysis of human activity dynamics using large-scale nighttime light datasets (2019–2023)*
- *Designed spatiotemporal analysis pipeline for extracting regional patterns and temporal evolution trends*
- *Quantified urban development and socio-economic activity through statistical indicators and spatial comparison*
- *Identified heterogeneous growth patterns across regions, supporting interpretation of collective human behavior*

ADDITIONAL EXPERIENCE

Milan Cortina 2026 Winter Olympic Games — **Milan, Italy**
Athlete Services Volunteer — *02.2026*

- Managed access control for competition and training areas and coordinated athlete schedules, notifications, and on-site guidance.

Student Union of Nanning Normal University — **Guangxi, China**
Presidium Member — *09.2020 - 06.2023*

- Coordinated over 40 university-level events involving 25,000+ participants, enhancing community interaction.

AWARDS & HONORS

- **Excellent Graduate Award**, Nanning Normal University (*2024*)
- **First Prize**, Teacher Ethics Speech Contest, Guangxi Autonomous Region (*2021*)
- **Excellent Student Cadre Award**, Nanning Normal University (*2021-2023*)
- **Best Volunteer Award**, Nanning Normal University (*2021*)

SKILLS

Methods | Spatial data integration, raster and vector analysis, spatial holdout validation, time-to-event analysis
Tools | Python, SQL, PostgreSQL, xarray, QGIS, ArcGIS Pro, Google Earth Engine, Git, Jupyter, LaTeX
Languages | Mandarin (native), English (research proficiency), Italian (basic)
Activities and Hobbies | Host, Speech, Dance, Swim, Tennis.
